

Baler RSA -98 High Speed

Package dimensions	
Package cross-section size	46×36 cm
Package length	Adjustable from 30 to 130 cm
Pickup	
Width inside opening	156 cm
Inlet width	175 cm
Distance between two end brackets	141 cm
Cylinder diameter	36 cm
Number of brackets	120 cm
Number of corner bracket holders	5
Compression piston	
Length of the movement path	76 cm
Speed	93 strokes per minute
Flywheel	
Diameter	73 cm
Weight	135 Kg
Specifications of tractor used	
Minimum output power in tractor's rear shaft	41horsepower
Tractor rear shaft speed	540 rounds per minute
Gearbox volume	
Amount of oil required	3.8 liters
Type of oil	Gearbox oil 90
Tires	
Right wheel tire	205/65-15
Left wheel tire	10/5-15
General dimensions of the machine	
Maximum machine height	175 cm
Machine length	478 cm in moving position
Machine width	259 cm
Machine weight	1530 Kg

Baler RSA-98 High Speed Specifications:

- 1- Hydraulic pickup lift
- 2- Feeding system with two high-capacity feeder forks
- 3- High maneuverability
- 4- Chain pickup transmission with clutch
- 5- -5reel pickup
- 6- Sending parts with the machine on customer's request
- 7- Installation and training by after-sale service team in any region
- 8- For export
- 9- Ability to send 10 machines in containers to all parts of the world

Ramesh Sanat Arak company, designed and distributed this baler in 8-2007 to meet the market demands and to rely on its own knowledge. In a short time, it has been able to find a place among distributors and consumers. Implementation of Product Tracking System, enables the company to examine and track all the machines it manufactures, after they are sold; and, the expert and consumers ideas about the products are used when necessary in order to ensure that the products distributed in the market are suitable for working in all agricultural conditions. One of the capabilities of this company is its competitiveness in both the regional and foreign markets with similar products; therefore, the products manufactured by this company are exported to Iraq, Tajikistan, Turkmenistan, Kazakhstan, and Armenia. Based on studies on different countries and the importance of exports, this company has prototyped Baler RSA98 High Speed, and is now in the production stage. Baler RSA98 is for export and its high speed is one of its advantages.
